

The super wealthy who operate in the best tax structures do not pay capital gains taxes. The reason why is because they do not create “taxable events.” If the taxable event has already occurred, then there is no option, you must pay the tax. However, if the taxable events have not occurred, then you can modify your personal or business structure and set yourself up for success. Ultimately, the only reason people pay capital gains tax is because of the structure they chose in the beginning.

Have you ever seen some companies grow 3, 4 or even 5 times faster than other companies? It is not because their sandwich tastes better. It’s most likely because they have the right advisors helping them. Most likely, they are keeping 20-30% more of the revenue they earn. Imagine having a marketing budget that is the size of the tax bill you pay.

Wealthy people are wealthy because they are willing to do things that normal people are not willing to do. They are willing to hire the right people who navigate them correctly through the tax codes. Most taxes are avoidable but not if you are close-minded. If you think mega millionaires and billionaires pay mega taxes, then you are wrong!

If you’re paying capital gains taxes, then you need to know that you’re invested using the wrong structure. At Nexxess International we specialize in personal and corporate structuring. No one should ever put themselves in a position to have to pay capital gains taxes. There is a better way to invest than the traditional methods that cause capital gains taxable events.

We know you probably love your Financial Advisor or Stock Advisor, but if they have you paying capital gains then they’re not doing their job. What good is it to make 20% return on your investment this year if you have to give back 25% to 40% to the government?

With our personal and corporate structuring strategies you can still buy that same rental house, cryptocurrency, stock, or private investment that you have now, but without the capital gains taxes eating your lunch. With our structures you get to control if you’re going to pay a capital gain or not, no matter how many times you buy and sell per week or month.
